HOLISTIC CHANGE
FOR LIFELONG
RESULTS

Training Philosophy

“What would you do if you knew you could not fail?” As a trainer, coach and body worker, I consider myself a holistic healer. We will look at every aspect of your health to help you achieve your goals. I will draw experience from a plethora of different philosophies for a holistic approach to your success. Every day we will take one step closer towards your goals. We never digress and are always moving forward mentally and physically. With a strong background in physical therapy and chiropractic, I have the ability to teach you to manage and prevent injuries through various modalities such as strength training, corrective exercises, stability and circuit training, hydrotherapy, and multiple soft tissue and flexibility techniques. With training in SMFR, Gua Sha, Structural Re-integration, sports and medical massage, SMART technique (like ART), cupping, TRX, BOSU, yoga trapeze, aqua therapy and competitive swimming, I will ensure you will not just work hard, but also learn long term behavioral change for lifelong results.
